## Grass Valley Web Site

The www.grassvalley.com web site offers the following:

**Online User Documentation** — Current versions of product catalogs, brochures, data sheets, ordering guides, planning guides, manuals, and release notes in .pdf format can be downloaded.

**FAQ Database** — Solutions to problems and troubleshooting efforts can be found by searching our Frequently Asked Questions (FAQ) database.

**Software Downloads** — Download software updates, drivers, and patches.

grass valley

## END-OF-LIFE PRODUCT RECYCLING NOTICE

Grass Valley's innovation and excellence in product design also extends to the programs we've established to manage the recycling of our products. Grass Valley has developed a comprehensive end-of-life product take back program for recycle or disposal of end-of-life products. Our program meets the requirements of the European Union's WEEE Directive, the United States Environmental Protection Agency, and U.S. state and local agencies.

Grass Valley's end-of-life product take back program assures proper disposal by use of Best Available Technology. This program accepts any Grass Valley branded equipment. Upon request, a Certificate of Recycling or a Certificate of Destruction, depending on the ultimate disposition of the product, can be sent to the requester.

Grass Valley will be responsible for all costs associated with recycling and disposal, including freight. However, you are responsible for the removal of the equipment from your facility and packing the equipment to make it ready for pickup.

For further information on the Grass Valley product take back system please contact Grass Valley at + 800 80 80 20 20 or +33 1 48 25 20 20 from most other countries. In the U.S. and Canada please call 800-547-8949, and ask to be connected to the EH&S Department. Additional information concerning the program can be found at: www.grassvalley.com/about/environmental-policy

## Software Problems Corrected in Release 6.1.2

| Area | Problem | ID |
|---|---|---|
| | Faders set to the same numeric value sometimes do not move to the same physical position relative to one another | PR40152 |
| | If a virtual source isn't loaded on a Page in the GUI, it doesn't appear in the Live window. | 114489 |
| | When running a TME from the timeline that contains a TakeAllSourcesOff task, a Virtual Source control that is in an error state is removed from Live View but the slider position is not changed to Off level. | 114524 |
| | Clicking Hold on a fader in preview doesn't enable hold for that virtual source. | 114529 |
| | "TME Device Data" setpoint is incorrect in IQ template. | 114493 |
| | QUICbox displays Virtual Source "Name" instead of Virtual Source "Abbreviation". | 114487 |
| | After modifying a Virtual Source, changes aren't reflected in the GUI until that page is reloaded. | 114485 |

## Known Software Problems and Limitations

### Calrec Audio Problems

There are no known Calrec audio problems.

### Calrec Audio Limitations

There are no known Calrec audio limitations.

## Ignite Katalyst Problems

| Area | Problem | ID |
|------|---------|-----|
|  | If the current Katalyst profile is replaced by a new profile, and a Katalyst fader module is subsequently removed from the current Ignite configuration while the module is in Live mode, dynamic faders assigned to the module may not be released for use on remaining modules in the configuration until further action is taken. | PR40163 |

The workaround for this problem is to either:

- Reload the appropriate Ignite Katalyst profile

- Reload the current Ignite configuration

- Cycle the Ignite configuration from Live to Prep, and then back to Live

## Ignite Katalyst Limitations

- In any given profile, dynamic faders should only be assigned to one panel with up to three fader modules.

- Simultaneous use of both a QUICbox panel and an Ignite Katalyst panel is not supported. However, switching between the two is supported via the Ignite Katalyst Profiles Editor Ignite Operation menu.
