Release Notes for Ignite v11.0.3

Bug fixes

[IGN-7973] Ignite event's status may not be shown correctly in Preview Event Inspector or Playlist

- Ignite now shows an event's "Preview" or "On-air" status correctly.

[IGN-7978] Rundown may not get imported properly if there are Densite GPI-1501 devices defined in the configuration

- If there are Densite GPI-1501 devices defined in the configuration, a rundown can now be imported properly.

[IGN-8068] Some events with machine control devices may not get opened after users select "Save and Close" in Event Builder

- Ignite can now reopen events with machine control devices that have been saved and closed.

[IGN-8085] Vinten camera preset hotkey settings may not get saved on exit if there is a rundown loaded on the timeline

- If there is a rundown loaded on the timeline, Ignite will save the Vinten camera preset hotkey settings on exit.
